- explore and try out new tools and methods to implement inclusive activities?
- share good practices and develop new ones?
- get to know same-minded people from all around Europe and exchange ideas?

If **YES**, this training course is
for you!

Short Description

Work with children, especially with children with special needs, comes with necessity of adapting the activities and finding innovative and inclusive methods for teaching. With this training course, focusing on inclusive education we would like to give teachers, educators and youth workers the background understanding and efficient tools to implement inclusive activities for their target groups. The goal is to share good practices and develop new ones that will offer appropriate educational activities for all children and young people.

European Children's Towns

A children's town is a hands-on project for children with the aim of conveying complex relationships from the adult world in a playful way. In their own city, the participating children can try out different jobs, make political decisions together and, of course, have a lot of fun. This creates a city life that the participating children shape and develop themselves. They have to playfully deal with democratic voting processes and topics such as social coexistence, work and wages, self-determination and co-determination.

An interactive and engaging programme, giving participants the chance to road test and experience tools themselves.

A space for meaningful knowledge exchange with participants encouraged to share their experiences and tools.

Cities of Learning playlists and badges as pathways of learning.

A networking opportunity to meet and connect with others in the field who have an interest in working with young people.

Special features of this course

Objectives

This training course aims to give participants space to experience and share tools and approaches as well as investigating new opportunities, all the while having an eye on the realities and challenges of using them.

Explore and review different tools and methodologies and develop increased skills and recognise how to apply them in international youth work

The training programme is designed to provide a safe space for sharing, with experiential learning and a chance to try out different tools and explore how they can be applied to youth work practice.
